

## Feature & Nutrient

- Satisfying the nutrient requirements for rats and mice, it is feed optimized for maintaining body shape and breeding.
- With the technology of Optipharm Medipig, we are producing feed that is optimized for the growth stage.
- This product is designed to provide sufficient nutrients for growth.
- It is formulated based on the National Institutes of Health Rat and Mouse Diet (NIH #31).
- It is an essential feed in breeding SPF experimental animals.
- The destruction of nutrients is minimized during irradiation and high-temperature autoclaving, ensuring the required nutrients are provided.

**NIR (near infrared measuring equipment) is used to establish a real-time quality management system.**

The results of a quick and accurate analysis are reflected in product quality in real time.

Division	Unit	Ingredient amount	Division	Unit	Ingredient amount
PROTEIN		20.00	CYSTINE	%	0.40
FAT		3.50	VIT A	IU/Kg	20,000.00
FIBER		4.50	VIT D3	IU/Kg	4,500.00
ASH		6.80	VIT E	Mg/Kg	64.00
CALCIUM	%	0.90	VIT B12	Mg/Kg	125.00
PHOSPHORUS		0.70	NIACIN	ppm	60.00
LYSINE		1.20	CHOLINE	ppm	15,815.00
METHIONINE		0.40	ME_GROWER	Kcal/Kg	3020.00
